

# Got a spare toothbrush?

## Help put a smile on their faces...

The Rotaract Club of South Brisbane is a non-profitable community organisation for young men and women aged 18 to 30: a part of Rotary International. One of our current International projects is supporting an exciting Rotary dental mission taking place throughout communities in the Philippines.

A number of Rotary Clubs and the Cataract Foundation have been carrying out eye and ear missions in the Philippines for a number of years and noticed a need for dental issues of the local people to be addressed. This year a dental aspect will be added to the mission.

A team of volunteers, including one of our own Rotaractors Sharni Bartlett, will be working alongside local dentists who are mainly members of the participating local Rotary Clubs. The primary concern of the dental mission will be oral health education for the local school children as well as carrying out emergency dental treatment wherever possible.

## How can I help?

Please donate any toothbrushes you might collect from hotels, planes etc or pop to the supermarket and buy a toothbrush. We would also love donations of floss and toothpaste if you can spare some. (Please note we only want new and unused items!)

**DONATIONS MUST BE RECEIVED BY 1st OCTOBER 2009**
